Front End Technologies   AngularJS   Duration: 1 Day

AngularJS Elements and Validations

1. Include different form elements into your program like textbox, selectbox, checkbox and radiobutton.

2. Validate the form using required and email. Also apply a custom validation.

3. Program to apply animations to ng-show and ng-hide.

4. Program to show routing using ng-route. Also include $routeProvider and otherwise() into your program.

Things to know:

Understand Animations and routing.
